HALL NO 7	6	EEPC INDIA	www.eepcindia.org	EEPC India has been the face of Indian engineering exports over a span of 63 years when India grew from a nation exporting just \$10 million of engineering goods in 1955 to \$81 billion in 2018-19 and is regarded as the model EPC in India by the Union Ministry of Commerce and Industry. EEPC India is now a full member of the France-based UFI and the Global Association of the Exhibition Industry and our Annual Show, IESS received the status of UFI-approved International Event from the VIth edition held in March 2018. EEPC India also received BMO accreditation of the Quality Council of India (QCI) NABET (National Accreditation Board for Education and Training is one of the constituent boards of the QCI). The BMO accreditation mechanism by all stakeholders is becoming a game-changer towards nation-building, in promoting and developing strategies for MSMEs to participate in various government schemes including Make in India, Zero Defect Zero Effect (ZED), and Start Up India. EEPC India is the premier trade and investment promotion organisation in India. It is sponsored by the Ministry of Commerce & Industry, Government of India, and caters to the Indian engineering sector. As an advisory body it actively contributes to the policies of the Government of India and acts as an interface between the engineering industry and the government. Set up in 1955, EEPC India now has a membership base of over 13,000 out of whom 60% are SMEs. EEPC India organises a large number of promotional activities such as buyer-seller meets (BSM) both in India and abroad, overseas trade fairs/exhibitions, and India pavilions/information booths in selected overseas exhibitions to demonstrate the capabilities of the Indian engineering industry and to provide overseas buyers with true value as propagated by Brand India. Indian Engineering Exhibition (INDEE) is EEPC India's own brand and is one of the largest expositions of engineering in the world. Over a period of 42 years INDEE has been established as the largest and most important showcase for Indian engineering abroad. EEPC India facilitates sourcing from India and encourages MSMEs to raise their standard at par with international best practices. It also encourages MSMEs to integrate their business with the global value chain. To encourage building global partnerships with India, EEPC India organises the International Engineering Sourcing Show (IESS), the largest display in the country of engineering products and services, every year. This is recognised as the only engineering sourcing event in India showcasing the latest technologies and a preferred meeting place for global buyers and sellers. This show is also important to encourage foreign investments in line with the newly-initiated Make in India campaign by the Government of India. Extending its regular agenda, EEPC India publishes several reports/studies to make its members aware about international trends and opportunities in order to enhance their global footprint. With "Engineering the Future" as its motto, EEPC India serves as the reference point for the Indian engineering industry and the international business community in its efforts towards establishing India as a major engineering hub in the future.

HALL NO 7	17	NTPC LIMITED	www.ntpc.co.in	NTPC is India's largest energy conglomerate with roots planted way back in 1975 to accelerate power development in India. Since then it has established itself as the dominant power major with presence in the entire value chain of the power generation business. From fossil fuels it has forayed into generating electricity via hydro, nuclear and renewable energy sources. This foray will play a major role in lowering its carbon footprint by reducing green house gas emissions. To strengthen its core business, the corporation has diversified into the fields of consultancy, power trading, training of power professionals, rural electrification, ash utilisation and coal mining as well. NTPC became a Maharatna company in May 2010. As of January 2020, there are 10 Maharatnas CPSEs in India. NTPC is ranked No. 2 Independent Power Producer (IPP) in Plants Top 250 Global Energy Company rankings.
